Project Description*

The roads around all areas of the cemetery are in dire need of improvement. Potholes need filling. Proper drainage needs to be established. We are to the point of closing some access roads because cars that are low to the ground have experienced damage to the undercarriage due to the condition of our roads. Improving the roads will make it easier for all people to visit the graves of their loved ones and explore the rich history of Lincoln County's founders. The economic impact is that tourists who visit the cemetery will have a better experience and share on social media. Yes, there are people who visit cemeteries as part of their vacation experience. Job creation will come in the form of employees from Road and Driveway doing the initial work and then we would plan to bring in a local company to do maintenance on a twice yearly schedule.

What is the project and what will it do for community and/or economic development? What tangible items or results will the project deliver? How will the success of this project be judged? IMPORTANT: This fund is not intended for staff or operations. Please describe the economic impact of the project and how it creates or retains jobs in the community.

Funding*

We were denied a grant by the Oregon Historic Cemeteries Association as they favor projects that have historical significance. In 2025 we are beginning a Capital Campaign to assist with funding road improvements, better signage, building improvements. The highest priority of our campaign is to use funds for roads around the cemetery.

If applicable, please describe status of other funds which you plan or have applied to and whether received. Please give the name of the fund, source of the funds, and when you expect to received an answer regarding funding availability. Also, list any other funds for which you have applied but were not funded. How much did you ask for, from whom, and why was the application not funded?

Collaboration*

Road & Driveway for bids/options and then doing the actual work. Unfortunately, because we are on the Coast, companies from the Valley can't address our issues without a lot of added travel expenses. Therefore, Road & Driveway is our only bid.

If applicable, please list who you are collaborating with and why.

Viability*

The initial improvements will be seen immediately. However, without ongoing attention, our roads will eventually deteriorate. It will be imperative to the project that we continue to monitor and hire professionals to come in and grade/evaluate the roads. The cemetery can manage the financial burden of maintenance in the future. It's the initial costs of improvements that we can't afford.

How will the success of this project be judged? State success measures and timeline. Will this project need ongoing funding? and how will this be secured?
